1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

The following table shows the results of the regression analysis for the dependent variable "Perceived organizational support" (Table 1). The independent variables are "Organizational commitment" and "Organizational identification". The dependent variable is "Perceived organizational support". The table shows the coefficients, standard errors, t-statistics, and p-values for each variable. The overall F-statistic is 10.12, and the adjusted R-squared is 0.42. The table indicates that both organizational commitment and organizational identification are significant predictors of perceived organizational support.

Variable	Coefficient	Standard Error	t-Statistic	p-Value
Organizational commitment	0.35	0.08	4.38	0.000
Organizational identification	0.28	0.07	3.92	0.000
Constant	1.12	0.15	7.47	0.000
Overall F	10.12			0.000
Adjusted R-squared	0.42
